## **Reference for Adrian Finnegan**

### **ACE Recall Study Performance Coaching**

Helping me to be more focused and organised in my studies was very good. Most valuable about my coaching was how it helped me with more creative ways of revising and recalling. I really liked the aspect of talking about my schoolwork as it really helps to unload the burden.

When I read now I feel like I understand things more. And I can do it faster than before. I can memorise things more. I am more confident preparing, planning and revising, and performing at my best in exams. I feel like I have learned everything and recalled it, and that has boosted my exam technique.

I strongly feel like a more active student, more engaged in the subjects I don't like that much, and more confident in my ability.
